Four men of two different professions made a choice. Our common ground...Psy

Trance. Our choice is to let the music encompass our lives and yours. We have had Psy Trance guide our existence since 1998, when we were first introduced to a new era of music. Our mania grew steadily with the likes of *Hallucinogen*, *Cosmosis*, *Green Nuns of the Revolution*, *Slide*, *Kox Box* and many other masters.

To this day, our Psy experience has brought so much to our lives, that we feel our contribution to it has become an acute necessity. Thus, Amaris "*The Child of the Moon*" was born.

In the last several years, the talent available within the Psy Trance world has escalated to extraordinary levels. All the released and unreleased music available makes producing and giving it an additional arena to perform, an asset to our lives. It makes the exposure more potent and the commitment much stronger.

We at Amaris Records have studied the advent and growth of Psy Trance in congruence with our own lives. Whether pounding within four walls without a window, or erupting on a dance floor, psy thrives in the very essence of whom we were and who we have become. Thus, offering this platform to young and upcoming talent, who share the same fervor, is an exhilarating prospect and our contribution to the evolution of this music. This is our way of thanking the world of Psy Trance that preceded us, and additionally saluting that which is yet to be.
